Water In Central Asia Past
In Central Asia, a crisis is brewing over water and electricity. The Soviet-era system in which the five countries of the region shared their resources has broken down, leaving some facing water ...

Will Central Asia fight over water? - BBC News
Because Central Asia is not buffered by a large body of water, temperature fluctuations are severe, outside the sunny, hot summer months. In most areas the climate is dry and continental, with hot summers and cool to cold winters, with occasional snowfall.

Water scarcity is the lack of fresh water resources to meet water demand. It affects every continent and was listed in 2019 by the World Economic Forum as one of the largest global risks in terms of potential impact over the next decade. It is manifested by partial or no satisfaction of expressed demand, economic competition for water quantity or quality, disputes between users, irreversible ...

This high-oblique, northeast-looking space shuttle photograph captures a portion of Southern Honshu Island and Shikoku Island of Japan. The darker areas show volcanic, mountainous terrain that comprises more than 80 percent of Japan; the lighter, more highly reflective areas of the coastal plains and valleys are urban and agricultural areas.

USAID plays a vital role in partnering with the countries of Asia to ensure that the development decisions they make today help realize their long-term success by moving them forward on their journeys to self-reliance. We define this end-goal as the day when they are able to plan, finance and implement solutions to solve their own development challenges.
